PROFESSIONAL SUMMARY

Software Engineer with 20+ years of experience designing, developing, and delivering scalable web and enterprise applications across the full software development lifecycle. Strong background in full-stack development, system design, and backend architecture using modern and legacy technologies. Proven ability to translate business requirements into reliable technical solutions and support end-to-end delivery in fast-paced environments. Experienced in collaborating with cross-functional and distributed teams to build maintainable, high-performance systems. Committed to continuous learning and staying current with modern development practices and tools.

CORE SKILLS

- System Design, Microservices, APIs
- Java, Python, Node.js
- HTML, CSS, JavaScript, React, React Native
- SQL & NoSQL Databases
- CI/CD (Jenkins, TeamCity)
- Git, JIRA
- Agile/Scrum, SDLC

PROFESSIONAL EXPERIENCE

FULL STACK SOFTWARE ENGINEER | PROJECT MANAGER (FREELANCE)

Mar 2021 - Present

iNETKO Solutions

Bethel, CT

- Manage client projects from requirements gathering through delivery, ensuring alignment between business needs and technical solutions
- Produce detailed technical documentation for a client's legacy application to support system understanding, maintenance, and long-term support
- Serve as the primary client-facing technical contact, troubleshooting and resolving application issues
- Provide ongoing application support, maintenance, and enhancements to improve performance and user experience
- Coordinate project timelines, deliverables, and communication across stakeholders and the technical team
- Translate business requirements into technical specifications and system designs

- Analyze existing systems to identify improvements and optimize performance

SOFTWARE DEVELOPER (REMOTE VOLUNTEER)

Nov 2020 - Present

Watchtower

Warwick, NY

- Build custom Python tools for Autodesk Maya, streamlining animation and VFX workflows and increasing team productivity
- Develop custom Qt (PySide2) GUI components for an in-house content and asset management system
- Contribute to a custom AI-powered tool using Python and Qt, enabling rapid image and video generation, demonstrating hands-on AI integration experience
- Deliver features and bug fixes within a remote Agile team operating in two-week sprint cycles
- Modernize legacy Python 2 codebases to Python 3, improving maintainability, compatibility, and system stability across internal tools. Leverage AI-assisted development workflows to analyze, refactor, and restructure legacy code, accelerating delivery and elevating overall code quality
- Produce professional onboarding and training videos for internal software tools and workflows, utilizing DaVinci Resolve for video editing, motion graphics, audio enhancement, and post-production to create clear and engaging instructional content
- Produce short demonstration films for the Audio/Video and Art Departments, managing full production from concept to delivery using generative AI tools including Nano Banana, Veo, ElevenLabs, Claude, and ChatGPT to develop scripts, voiceovers, visual concepts, and video content
- Apply advanced AI prompt engineering techniques to design, iterate, and optimize prompts for generating consistent, production-quality digital assets, including visual concepts, structured outputs, and creative variations aligned with project requirements

LOAN SERVICING PROGRAMMER I

Mar 2026 - Apr 2026

Newtown Savings Bank

Newtown, CT

- Programmed and maintained residential and consumer loan data within the COCC Insight core banking platform, ensuring data accuracy, integrity, and system compliance
- Utilized COCC Insight daily to support loan lifecycle operations, gaining hands-on experience with platform functionality, workflows, and underlying data structures
- Managed loan-related documentation using Identifi, ensuring accurate storage, indexing, and audit readiness in accordance with operational standards
- Analyzed loan data and system outputs to identify discrepancies, supported reconciliation processes, and resolved data issues
- Researched and resolved loan servicing exceptions in a production financial environment, strengthening problem-solving, investigative, and root-cause analysis skills
- Collaborated with internal teams to support workflow processing and ensure timely resolution of system-related requests and escalations
- Applied a strong software engineering background to rapidly learn system architecture, data flows, and business logic within a core banking environment

PROGRAMMER & ANALYST | DIRECTOR, IT & PROJECT MANAGEMENT

Aug 2021 - Feb 2026

*LSC Marketing Group
Bethel, CT*

- Served as the primary client contact for merge-purge orders, ensuring requirements were clearly defined, documented, and met
- Ran and monitored merge-purge processes to consolidate and deduplicate large client datasets
- Developed Python scripts to automate merge-purge workflows, data file handling, and repetitive account management tasks
- Created custom Python-based client reports to analyze and present merge-purge results, improving accuracy and reducing turnaround time
- Built automation solutions that reduced manual effort while enhancing the accuracy, consistency, and timeliness of client deliverables
- Maintained and supported legacy applications built on the .NET framework, C#, and Microsoft SQL Server, ensuring system stability, performance, and continuity of business operations.

SOFTWARE DEVELOPMENT MANAGER (2018-2021)

Jul 2006 - Mar 2021

SENIOR SOFTWARE ENGINEER (2016-2018)**SOFTWARE ENGINEER (2006-2016)**

*Kitchen Brains
Stratford, CT*

- Led architecture, development, and maintenance of cloud, mobile, and gateway systems across the full software lifecycle
- Served as Technical Lead and Scrum Master, driving Agile delivery through planning, standups, reviews, and retrospectives
- Partnered with clients and vendors to define requirements, align solutions, and resolve technical issues
- Provided L3 production support for cloud, mobile, and gateway platforms in coordination with QA and support teams
- Designed and developed RESTful APIs and backend services using Java, Spring, JSON, and XML
- Built and maintained microservices using Spring Boot and MariaDB for scalable backend systems
- Developed containerized services using Python and Docker for distributed deployments
- Designed IoT solutions using Python, MQTT, and AWS cloud services
- Led modernization of legacy systems by migrating Dojo/JSP/Spring MVC applications to React and Node.js
- Supported cloud migration initiatives from AWS to Microsoft Azure and improved system scalability and reliability
- Implemented DevOps and security practices including CI/CD pipelines (Ant, Maven), Spring Security, and enterprise authentication/authorization
- Built and optimized hybrid mobile applications using WebView, JavaScript, and REST APIs to support cross-platform functionality

SOFTWARE ENGINEER (2002-2006)

2001 - 2006

WEB DEVELOPER (2001-2002)*Photronics, Inc.**Brookfield, CT*

- Developed enterprise web applications using Java, JSP, Servlets, HTML, and JavaScript
- Supported intranet and business automation applications across departments
- Migrated legacy JavaScript applications into server-side Java implementations

ENGINEERING ASSISTANT

2000 - 2001

*Merlot Communications, Inc.**Bethel, CT*

- Assisted in the UI development of intranet and web applications
- Developed applications for embedded systems using C++, Java and HTML

EDUCATION

Nucamp Coding Bootcamp

2025 - 2026

Online

- Women in Tech Scholarship Recipient
- Completed an intensive full-stack software engineering program covering HTML, CSS, Bootstrap, JavaScript, React, React Native, Node.js, Express, MongoDB, Python, SQL, and DevOps practices
- Built multiple web and mobile applications integrating front-end and back-end systems with cloud-ready deployment workflows
- Gained hands-on experience working with APIs, authentication systems, relational and NoSQL databases, CI/CD pipelines, and Agile SDLC methodologies

Westwood College

2004 - 2006

Denver, CO

- Associate's of Applied Science in Software Engineering
- Dean's List (All Terms)
- Graduated with honors; 4.0 GPA
- Member of the Alpha Beta Kappa National Honor Society

Western Connecticut State University

1996 - 2000

Danbury, CT

- Completed 50% of credits towards B.A. in Computer Science
